

MEMORANDUM FOR THE RECORD

SEMS DocID

593772

TO: John Fitzgerald, P.E., Principal Sanitary Engineer. JF

FROM: Ida Babroudi, Senior Sanitary Engineer BB

DATE: January 29, 1987

SUBJECT: MIDDLETON - American Glue&Resin, Inc.
40 School Street, Middleton, MA 01949
Cheryl A. Auterio (617) 774-7111
DEQE Case # 3-168

On January 29, 1987, Tom Mahin and the writer visited the subject site for a tour of the facility. Present were Cheryl Auterio, the owner of American Glue&Resin, Inc. Mark Hellstein, and Chris Denfeld of ECS.

The writer had reviewed ECS's proposal & had several comments which she discussed with Mr. Hellstein. The writer recommended: an upgradient well, at least one continuously sampled boring, subsurface conduit information, surveying the wells, and potential for analysis of other parameters should the Phase I report reveal additional information.

While touring the facility the writer observed the changes made since the last visit such as: plugging drains & "holes" inside the facility, blocking a catch basin in the yard, & some housekeeping improvements.
